And it works (pretty much)
But the admin.php page
does not work

 **Scott Finegan** [PM]

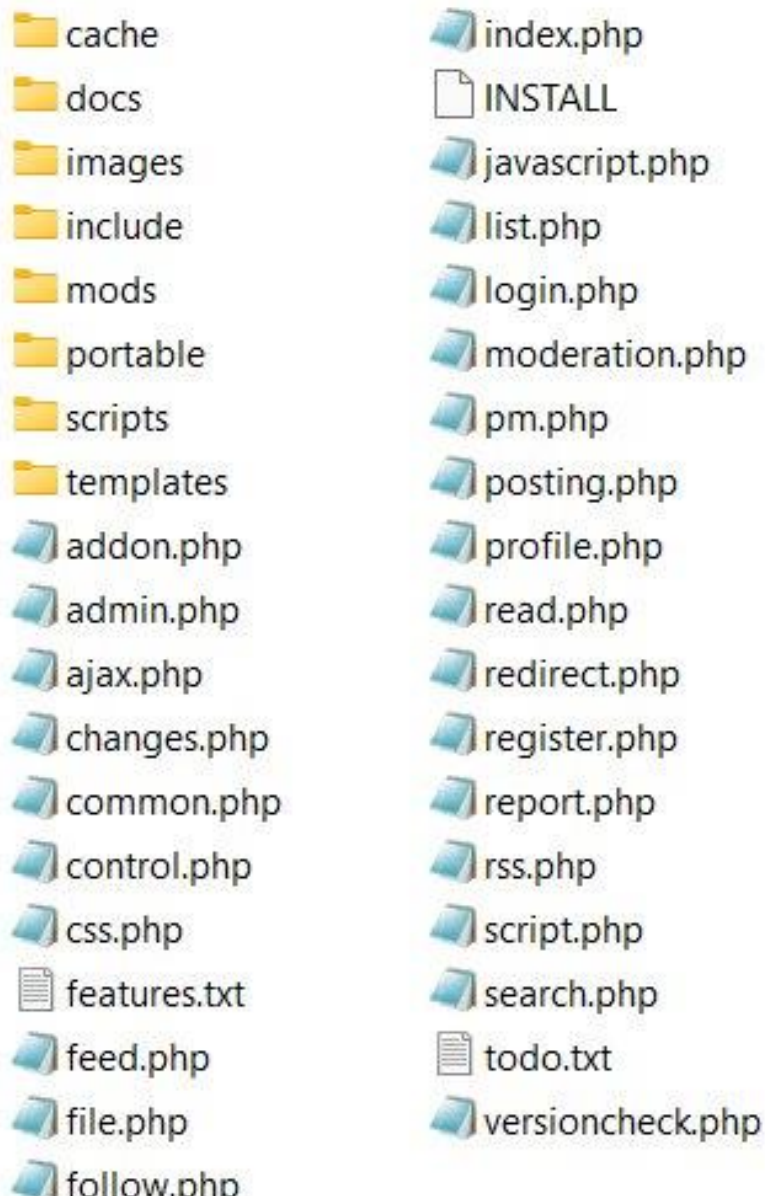

Re: Fixes for PHP 7/8

The file I downloaded and saved last year was created Aug. 13 of 2021
available here -> www.phorum.org

 Quick Reply  Reply  Quote  Report

I download the new files

I place them in my forum folder by remplacing the old ones

Checking your system

Prior to installing Phorum, your system will be checked to see if there are any problems that might prevent Phorum from running correctly. Below you will find the results of the checks. Warnings indicate that some problem n but that the problem will not keep Phorum from running. Errors indicate critical problems, which need to be fixed before running Phorum.

ALL IS OK	Phorum cache
ALL IS OK	Database connection
ERROR	Check if all required Phorum files are available (show problem info)
ALL IS OK	Language support
ALL IS OK	PHP safety issues
ALL IS OK	PHP version
ALL IS OK	Valid Phorum settings

One or more critical errors were encountered while checking your system. To see what is causing these errors and what you can do about them, click the "show problem info" links. Please fix these errors and restart the syste

[Restart the system checks](#)

Here is admin.php with the new files

Checking your system

Prior to installing Phorum, your system will be checked to see if there are any problems that might prevent Phorum from running correctly. Below you will find the results of the checks. Warnings indicate that some problem exists, but that the problem will not keep Phorum from running. Errors indicate critical problems, which need to be fixed before running Phorum.

ALL IS OK	Phorum cache
ALL IS OK	Database connection
ERROR	<div>Check if all required Phorum files are available (hide problem info)</div> <div>Problem: One or more files in your Phorum tree are no longer part of the Phorum distribution. Please, remove the following file(s) from your Phorum installation (the ones in red are highly recommended for removal):<ul style="list-style-type: none">• post.php• include/format_functions.php• include/index_classic.php• include/timing.php• include/profile_functions.php• include/templates.php• include/thread_info.php• include/thread_sort.php• include/email_functions.php</div> <div>Possible solution: This could happen after installing a newer version of Phorum on top of an existing Phorum installation. In this newer version, some files might no longer be in use. To prevent conflicts, it is best to remove these files from the installation directory.</div>

I must to delete some files

« SAPBM > web > Forum > include >

Rechercher dans : in.

- | | |
|----------------------|--------------------------|
| admin | index_classic.php |
| ajax | index_new.php |
| api | moderation_functions.php |
| config | profile_functions.php |
| controlcenter | templates.php |
| db | thread_info.php |

| cache.php | |
| cache_memcached.php | |
| constants.php | |
| email_functions.php | |
| format_functions.php | |

rtacé

I delete them manually

- admin
- ajax
- api
- config
- controlcenter
- db
- index
- javascript
- lang
- misc
- moderation
- posting
- .htaccess
- api.php
- cache.php
- cache_memcached.php
- constants.php
- index_new.php
- moderation_functions.php
- upload_functions.php
- users.php
- version_functions.php

After deletion

Checking your system

Prior to installing Phorum, your system will be checked to see if there are any problems that might prevent Phorum from running correctly. Below you will find the results of the checks. Warnings indicate that some problem needs to be fixed, but that the problem will not keep Phorum from running. Errors indicate critical problems, which need to be fixed before running Phorum.

ALL IS OK	Phorum cache
ALL IS OK	Database connection
ALL IS OK	Check if all required Phorum files are available
ALL IS OK	Language support
ALL IS OK	PHP safety issues
ALL IS OK	PHP version
ALL IS OK	Valid Phorum settings

No problems were encountered while checking your system. You can now continue with the Phorum installation.

[Continue ->](#)

I restart admin.php

Everything is OK!

Phorum Upgrade

Upgrades are available for Phorum.
This wizard will handle these upgrades.

Phorum has confirmed that it can connect to your database.
Press continue when you are ready to start the upgrade.

Continue ->

OK I click Continue
